

AP-LITE

The Pocket Sized AQUAPROBE

Don't need the standard water quality sensors?
Have a specific monitoring need?
The AP-LITE is for you

The AP-LITE is highly portable with its probe body measuring just 24mm in diameter and 250mm in length.

The probe body can accept any of our optical sensors - just screw the sensor in!

The AP-LITE is used with the GPS Aquameter for data recording, calibration and location tagging.

Optical Sensors:
Turbidity,
Chlorophyll,
Blue Green Algae,
Rhodamine,
Fluorescein,
Refined Oil.
